The IG met to review the draft options paper for submission to the NSC, as required by NSSD 7-82. OSD, JCS and DOE supported a public posture on CTB which would indicate that the US would have to continue nuclear testing as long as the US depends on a credible nuclear deterrent. ACDA and State opposed such a statement and supported an approach which would characterize the CTB as a long-term US objective. All agencies agreed, however, that the US should continue to observe the 150-kt threshold at this time.

Agencies were directed to prepare revised drafts of their options for submission to the NSC.
